Professional Summary

MERN Stack and Next.js developer with additional experience in React Native (Expo), currently in the 7th semester of a BS in Computer Science with a consistent 3.8 CGPA. **PEEF** Scholarship recipient. Self-directed learner who has independently built and deployed full-stack web applications, including a music streaming platform, a URL shortener, and a Next.js-based result checker. Comfortable deploying production applications on Netlify, Vercel, and Cloudflare Pages. Seeking an internship or entry-level role to apply and grow full-stack development skills.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, React Router, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB

Deployment & Hosting: Netlify, Vercel, Cloudflare Pages

Tools: Git, GitHub, Postman, VS Code

Experience

MERN Stack & Next.js Developer

2026 – Present

Fresher / Self-Taught

Jhang, Pakistan

- Independently learning and building full-stack projects using the MERN stack and Next.js through online resources, official documentation, and self-directed practice.
- Deployed multiple production-style applications using Netlify, Vercel, and Cloudflare Pages, gaining hands-on experience with modern deployment workflows.

Projects

1. Music – Music Streaming Web Application

2026

MongoDB, Express.js, React.js, Node.js (MERN)

- Built a full-stack, Spotify-inspired music streaming web app supporting browsing, playback, and playlist management, with a Node.js/Express.js REST API for track and playback data.
- Designed a React.js frontend with an interactive audio player and responsive UI, backed by MongoDB for persistent storage of tracks, playlists, and user data.

2. Sniply – URL Shortener

2026

MongoDB, Express.js, React.js, Node.js (MERN)

- Built a full-stack URL shortening application where users can paste a long URL and receive a short, shareable link.
- Developed a Node.js/Express.js REST API for short-code generation and redirects, with MongoDB handling data storage.
- Created a React.js frontend allowing users to create, view, and copy their shortened links.
- Implemented JWT-based authentication so users can manage only their own links.

3. Result Checker

2026

Next.js

- Built a Next.js web application that allows students to check their academic results online.
- Implemented server-side rendering and routing in Next.js for fast page loads and clean, shareable URLs.
- Deployed the application for public access, focused on a simple and accessible user experience.

Education

BS Computer Science

2023 – 2027

Government College University Faisalabad

*Affiliated : Government Graduate College Jhang – CGPA: 3.8 / 4.0 (7th Semester) | **PEEF** Scholarship Recipient*
Jhang, Punjab

- Relevant Coursework: DSA, OOP, DBMS, Web Technologies, OS.

Certifications

- Google AI Essentials – Coursera
- Google AI Professional Certificate – Coursera (In Progress)
- The Complete Full-Stack Web Dev Bootcamp – Udemy

Achievements

- Awarded the **PEEF Scholarship** for BS Computer Science degree.
- Maintaining a consistent 3.8 CGPA while independently learning full-stack development through personal projects.
